About Me

I'm a student passionate about programming and game development. I enjoy learning new technologies and creating small projects to improve my skills. I am curious by nature and love experimenting with new ideas, whether it's building interactive web animations, coding simple games, or exploring physics simulations. My goal is to keep growing my knowledge, apply it creatively, and eventually develop projects that are both fun and meaningful.

Skills

HTML

CSS

JavaScript

Java

Python

Game Development

Projects

Giant Ferris Wheel

An interactive 3D Ferris wheel animation built with modern web technologies.

[View Project](#)

Moon Orbiting Earth

Simulated Moon orbiting Earth using CSS and JavaScript animations.
